Dear Resident,

Proposed Mini Roundabout/Raised tables/carriageway resurfacing

As you will probably be aware Lacock Parish Council were successful in their substantial bid for funds via Local Highway Footway Improvement Group (LHFIG) to implement a highway improvement scheme at the junction of High Street/West Street.

Works have been agreed for the construction of a new mini roundabout at the junction of High Street/West Street, this will involve amendments to the kerb-line, signing, some underground cable works etc. These works will be done during the daytime under 3-way traffic signals from 15th January – 26th January 2024.

Once the above is completed the carriageway will be resurfaced, 2 raised tables constructed, new lining laid, and the site completed. These works will be completed under a road closure from 19.00-0000 on the 1st and 2nd February 2024.

You will still be able to gain pedestrian access to your properties for the duration, and a signed diversion route available for vehicles.

Noise and disruption will be kept to a minimum but if you have any issues please let me know.

Yours sincerely

S. Dearden
