Dear Resident,

East Street One-Way Proposal

We have received a proposal to make East Street One-Way from High Street in the South, down to Church Street in the North.

This has arisen because the majority of residents in East Street routinely enter from High Street and park on the left side of the road leaving room for one vehicle only to pass (see photos below). An issue then arises when a vehicle enters Church Street and, discovering Church Street has no exit, turns right into East Street and meets a vehicle travelling towards them. One of the vehicles must then reverse, often all the way back to where they started, into either High Street or Church Street. Quite apart from the inconvenience, this also imparts a potential danger to pedestrians and other traffic.

The proposal will need to be assessed by the appropriate departments within Wiltshire Council, but we believe that a One-Way sign at the South entrance from High Street and a No-Entry sign at the North entrance from Church Street will be all that is required. There is sufficient space in Church Street for vehicles to turn around and exit Church Street into West Street.

However, before we make a formal proposal to Corsham LHFIG (Local Highways and Footpaths Improvement Group), it is important that residents potentially affected should be able to make their views known.

The proposal will be discussed at the next meeting of Lacock Parish Council on Monday November 9th, 2026. If you have a comment, for or against, please either attend the meeting, or send a comment either:

By completing the form on the Parish Council Website at:
https://www.lacockparishcouncil.gov.uk/sample-page/comment
By Email to clerk@lacockparishcouncil.gov.uk
By letter to the address below;

We would very much like to hear from you.

Yours faithfully,

Lacock Parish Council
